Elsa Melendez
Director, Area de Tecnologías de Información
Del Gobierno de Puerto Rico
La Fortaleza, SAN JUAN PR 00901

To Whom It May Concern:

In response to the Request for Proposal issued by OGP, **AT&T** is pleased to submit this final proposal for your consideration. We would like to take this opportunity to thank you for considering AT&T as an alternative for your telecommunication services and we really look forward for the opportunity to provide you with our services.

We are submitting this proposal and quote information with the best interest in making our business relationship a long lasting one based on your needs and our commitment to providing you quality services. Enclosed you will find relevant information regarding our company and our proposal. Prices included are based on a minimum of 12 month agreement. Prices on longer term agreements may be substantially lower, subject to construction fees or other.

If you have any questions regarding our proposal, please feel free to contact me via phone (787) 360-4399 or email (macolon@att.com) at your earliest convenience.

Sincerely,

Maria Colon
Associate Sales Director

Proprietary and Confidential Information

This document contains proprietary information about AT&T, and is the sole property of AT&T. The information contained in this document is considered proprietary in nature and should not be disclosed, in whole or in part, to third parties outside of the relationship between **OGP** and AT&T, including but not limited to the public, PREPAnet, OnNet and/or any other telecommunications providers. It is to be solely reviewed by internal members of **OGP** and shall not be duplicated, in whole or in part, for any purpose other than to evaluate and respond directly to AT&T.

This document is valid for 30 days from the issue date, after which AT&T may withdraw it and modify the prices contained herein. Notwithstanding the aforementioned, the confidentiality provisions included above, shall survive such withdrawal, for a period of two years thereafter. This is a proposal, not an agreement. If AT&T should be awarded the opportunity to render its services, it would be contingent upon entering into a written agreement, which will set forth the terms for performance of the proposal. Changes to the original proposal may be the result of due diligence

A handwritten signature in blue ink is located on the left side of the page, approximately halfway down.

NOTA:

Los precios para los servicios aquí incluidos, se mantendrán fijos siempre y cuando no haya costos de construcción e/o instalación asociados a estos. Los precios aquí incluidos podrían disminuir sustancialmente, por compras en volumen y/o por contrataciones a términos mayores de 1 año.

The following regulatory charges apply and are subject to change:

Government Charges and Taxes:

These charges include sales, excise and other taxes and fees that ATT is required by law to bill our customers. These may change from time to time without notice.

PR Sales and Use Tax/ Municipality Tax:

These are fees and taxes assessed on services pursuant to the amended tax code of P.R. All telecommunications services and equipment provided to subscribers in Puerto Rico are subject to State Sales Tax and applicable Municipality Taxes. We do not keep these amounts.

Emergency Service 911:

This charge is imposed by the 911 Service Governing Board to help pay for such agency's expenses and services. Such charges are collected by telecommunication companies as required by law.

ATT Surcharges:

These are neither taxes nor government imposed assessments. They are not required by law but rather are ATT charges that are subject to change. We keep each of the amounts listed in this section.

Regulatory Program Fee:

This charge recovers or helps defray costs for various federal and state mandates and initiatives, including local number portability, number pooling and E911 services mandated by local and federal authorities.

Interlata Cost Recovery Fee:

This fee is charged to Voice Over Internet Protocol (VOIP) based services to pay regulatory related fees and expenses, including taxes, number portability charges, and related legal fees.

Federal Universal Service Fund Fee:

This charge recovers the fees charged by the Federal Communications Commission (FCC) to ATT for the Federal Universal Service Fund. ATT adjusts this fee according to the contribution factor established by the FCC each quarter.

Puerto Rico Universal Service Fund:

This charge recovers the fees charged by the Puerto Rico Telecommunications Regulatory Board (TRB) to ATT for the Puerto Rico Universal Service Fund. ATT adjusts this fee according to the contribution factor established by the TRB each year.

Puerto Rico Regulatory Fee

This charge recovers the fees charged by the TRB to ATT and paid by ATT to the TRB for their operating expenses.

FCC:

The Subscriber Line Charge is a charge to recover a portion of the cost of the subscriber line used to place and receive interstate and international calls.

AT&T Demarcation Policy:

Definition: The demarcation point (or point of demarcation) is generally defined as the connection between the customer-provided equipment (CPE) or wiring and the AT&T-provided regulated facility. It is also commonly referred to as NI/NID (Network Interface Device). In single-tenant buildings, the point of demarcation resides within the customer premises. In multi-tenant buildings, the point of demarcation will generally reside in the telco room, which houses facilities connecting to individual customers' premises. In exceptional circumstances, the owner of a multi-tenant building may have determined that there be a separate point of demarcation for each tenant in the building.

Types of Interfaces for Points of Demarcation: Different types of interfaces may constitute the point of demarcation for a given customer installation. The type applicable to an individual customer will generally depend on AT&T's selected access arrangement to that customer's building and the specific telecommunications services provided to that customer and/or other customers in the same building. The interface at your location is typically one of the following three:

- R66 punch block
- RJ48 jack
- RJ45 jack

AT&T does not recognize a practice of extending demarcation points. At the customer's request, AT&T can install non-regulated wiring beyond the AT&T regulated demarcation point. Non-regulated time and material charges will then apply.

Customer Responsibility: The customer ordering AT&T services is responsible to ensure there is a clear, suitable pathway and supporting structure(s) for AT&T regulated facilities and that proper termination is provided. The same applies to non-regulated service offerings

A 'path' may include, but is not limited to, poles, conduit (with pull string), trench, drilled entrance holes in block walls or foundation (to be sealed by customer), fire proof sleeves and/or plug when a fire wall must be penetrated, etc. 'Proper termination' may include, but is not limited to, multi-ground neutral (for bonding AT&T facilities as outlined in the National Electric Code book), backboards for AT&T entrance facilities or AT&T equipment (if required), commercial power for AT&T services (if required), etc.

Maintenance: AT&T has no responsibility for non-regulated PW, jacks or cable beyond the demarcation point. If a customer requests the maintenance of non-regulated PW, jacks or cable, it would be completed as a

billable non-regulated service. However, the AT&T technician will not perform field maintenance work if the customer's terminal equipment has not been removed or disconnected, nor will the technician work on any customer-provided equipment (CPE). Maintenance of non-regulated PW, jacks or cable will be limited to repair or replacement of the defective wire, jacks or cable. If the customer requests additional non-regulated work, a service order must be created.
